

The Communication Advantage

Total System integration allows control of all aspects of your system. From entrances to exits, accurate counts and automatic rate calculation, our systems provide user friendliness with high level sophistication. All products manufactured by Canadian Parking Equipment are designed and engineered with the finest quality and

craftmanship, ensuring a superior product. Engineering and production personnel will tailor your system to exacting specifications producing a "Turnkey" solution. Field support and a national distribution network ensure complete support of all installation coast to coast.
