

Infra-Red Remote Products

IR150 Infra Red Remote Receiver

- * Read Range : Up to 4M (12 feet)
- * Wiegand, RS232, RS485 format available
- * 100% Weather Proof
- * ASK(EM) Format
- * For remote control with Anti-pass back operation
- * Indoor/Outdoor Operation
- * No interference with windshield tint
- * 12 To 24 Volts AC or DC

IRT250 Infra Red Transmitter

- * Read Range : Up to 4M (12 feet)
- * Wiegand, RS232, RS485 format available
- * Code Set Method : Factory Programmed
- * Number of Codes : 1,000,000 Plus
- * Dimensions : 40mmW x 60mmH x 14mmD
- * Colour : Metal Case/Black Buttons
- * Power : One 12V Lithium Batteries (Supplied)
- * Battery life time (3~5 years)

INTRODUCTION IR 150

The IR150 designed for a broad range of access control applications. Its wireless design and small size make it easily adaptable for a variety of access control requirements.

Typically, the IR150 is used to control a door strike, barrier gate, automatic gate or automatic door operator. It contains an Infra-Red receiver which uses to pick up signals from up to 12 feet away.

INTRODUCTION IRT250

The IRT250 are the key chain versions of the Infra-red Transmitters product line. Don't let the small size fool you, these transmitters have all of the inherent characteristics of the MIRT line of transmitters built into a smaller, more convenient, key chain sized package.

The IRT250 come from the factory preprogrammed to one of over a million different code combinations. They also have a 10 second time-out feature that will prevent complete systems from being shut down by a single transmitter transmitting continuously.

Lithium batteries (supplied) will provide up to 5 years of service.
