

FLUSH MOUNT MOTORIZED TRAFFIC CONTROLLER TC-12M

Sabra Tooth
Stainless Steel
Patented
Dual Tooth

FEATURES

The TC-12M Penetrating Traffic Controller is designed to be unique in the parking industry which requires a higher degree of security.

The Model TC-12M Flush Mount Sabre Tooth Motorized Traffic controller can be attached to existing driveways or new driveways (asphalt or cement) by means of bolts or epoxy. Any width driveway can be controlled by installing units end to end.

The TC-8M is fabricated from 1/4" Stainless steel plate and will carry the heaviest highway axel load expected in normal commerce.
