

SURFACE MOUNT MOTORIZED TRAFFIC CONTROLLER TC-8M

TC-22M
This unit combines all the features of TC-8M but in a Non-penetrating configuration

FEATURES

The Model TC-8M Surface Mount Sabre Tooth Motorized Traffic controller can be quickly attached to existing driveways or new driveways (asphalt or cement) by means of bolts or epoxy. No excavation or cutting is required in normal installations. Any width driveway can be controlled by installing units end to end.

Because the TC-8M is all above grade, drainage problems are minimal. The TC-8M is fabricated from 1/4" steel plate and will carry the heaviest highway axel load expected in normal commerce.

SPECIFICATIONS

Controller : 36" Long x 20" Wide x 2" High. (Overall Height with blade extended 4.4").
Cabinet : 19" Wide x 13" Depth x 13" High with post mount warning light.
