- Use Data Chip Readers
- Hi-Speed 80 Column Printer
- Optional 2000 Users

### OVERVIEW

The SYSTEM 4 Access Control System supports up to 500 users. Each user can be added or deleted in seconds. The built-in relays can switch power to electric Door Locks, arm or disarm Alarm Systems, shunt Alarm Devices, or operate Garage Doors.

Enter a secured area using Keypads, Card Readers, or Data Chips. A Passive Infrared or Request-To-Exit (RTE) button can be used to exit an area, and a Magnetic Contact can be installed to report a Door Ajar condition. Eight time schedules (64 time zones) are provided for applications requiring time restriction of users and/or automatic relay operation.
